

HERBICIDE

## STOP ACTIVELY GROWING WEEDS NOW

Observe visible results of control against actively growing grasses in 1–2 weeks with this versatile herbicide. Sedara™ 2 EC will maintain soybean, alfalfa, dry bean, peanut, and others crops grass free, weakening and stunting grass growth. Active ingredient clethodim makes Sedara 2 EC a go-to post-emergent solution against annual and perennial grasses when applied at early growth stages.

### KEY FEATURES

- Effective grass control on a variety of crops
- Controls volunteer corn in soybeans

### KEY WEEDS CONTROLLED

- |                                  |                    |
|----------------------------------|--------------------|
| • Annual and Perennial Bluegrass | • Large Crabgrass  |
| • Annual and Perennial Grasses   | • Quackgrass       |
| • Barnyardgrass                  | • Smooth Crabgrass |
| • Bermudagrass                   | • Volunteer Barley |
