HERBICIDE

LOCK DOWN TOUGH BROADLEAVES

Bequest™ 4 SC contains mesotrione, a selective HPPD-inhibitor herbicide offering rapid contact and long-lasting residual control of tough broadleaf weeds. It helps control populations resistant to glyphosate, ALS- and triazine-inhibitors. Key targets include velvetleaf, pigweed, sunflower, cocklebur and nightshades. Safe on labeled crops, it can be applied pre- or post-emergence—alone or in tank mixes—to protect yield potential.
